

MACO Hotel CMS

Based on various research and development, Maco has come up with multi dimensional Hotel CMS, which covers various requirements and demands of the user. It manages Hotels details, Categories, Hotel facilities, room facilities, costing, taxes, PAX limits, Hotel mapping, and new hotel addition, UI page complete setting.

The settings for website includes the editable contents for about us, contact us, image galleries and similar listings. In the Hotel Content Management System the customers can search for hotels according to their favorite destinations, check the complete packages and facilities with special offers. From website itself, customer can make a query anytime for different hotel packages and relevant details.
