

Maco Travel CMS

Travel Content Management System is a web based content management system for tour operators and travel agencies to create/ manage domestic tour, International tours, daily/fixed packages, weekend packages, hot deals with blogs, reviews & testimonials with query data bank on the website which increase your online territory.

Maco Travel CMS is a dynamic product that replaces the need of a static website. The flagship feature of Travel Content Management System is the back office, which allows the admin-user to manage their complete information of packages, day wise itineraries, inclusions & exclusions with tour maps. Admin can also update his blogs, events, special packages, getaways packages, destinations and offers by his own, even without any deep computer's knowledge.

A customer can get a complete informational package from these types of websites by which he/she can make an enquiry any time to know the detailed information about the packages.
